Ancient world without borders
GEOSCIENTIFIC AND OTHER
NATURAL VALUES

Novohrad - Nógrád Geopark is the first geopark in the European Geopark Network and Global Geopark Network assisted by the UNESCO that has been an international (cross-border) geopark from the beginning.

In our planet there are several areas where scientist and the public can uncover the chapters and traces of Earth’s 4.6 billion-year history. In a geopark there are several sites of earth-scientific importance which also provide a spectacular sight. The organization in charge of the geopark management preserves and presents geological, landscape, natural, ecological, archaeological, historical and cultural heritage and integrates all these to form geo-touristic offers, thereby developing the local economy.
