

ADAMELLO BRENTA GEOPARK

Madonna di Campiglio - Italy

8th INTERNATIONAL CONFERENCE ON UNESCO GLOBAL GEOPARKS

8-14 SEPTEMBER 2018

The Adamello Brenta UNESCO Global Geopark invites you to discover the uniqueness of its geodiversity: two different geologic and geomorphologic mountain ranges facing each other, glaciers, lakes, waterfalls, karstic springs, fossils, caves, magmatic, sedimentary and metamorphic rocks all in one place. But also brown bears, chamois, deers, eagles, marmots and many other animals. And again forests of fir, beech, larch, flower-filled meadows, pastures and much more.

As well as the people living these mountains, proudly following the traditional activities and engaged in promoting a social and economic sustainable development.

Come visit the Adamello Brenta UNESCO Global Geopark and participate in the 8th International Conference on UNESCO Global Geoparks in September 2018 to find out the secrets of the Earth's history and live the Italian natural and cultural heritage!
