European Geoparks Week 2019

Report

Name of Geopark: Adamello Brenta UNESCO Global Geopark

Dates of EGN week: 22nd July – 28th July

Contact person/e-mail: Vajolet Masè, vajolet.mase@pnab.it

Special motto of geoparks week: “Discovering the Adamello Brenta geology in all his faces”

1. Please give the following information:

- number of activities/events during geoparks week: 15
- number of press releases announcing geoparks week events: 5
- number of printed copies for program flyer/brochure/posters: 20,000
- number of printed articles on EGN week activities: 1
- total number of visitors/participants: 490

2. Highlight most successful activities of your Geoparks Week 2019:

During the Geopark’s week has been organized by the Adamello Brenta Geopark in collaboration with the local municipality and the local tourism offices a whole day excursion to discover the mountain pasture tradition of the typical cows of Rendena valley. A whole day dedicated to geology, local food and living people customs of the Geopark all strongly linked together. People participating could experience the history and tradition of Adamello Brenta Geopark’s people.

- number of printed articles on EGN week activities: .............................................................. 10
- total number of visitors/participants: ................................................................................. 1600

2. Highlight most successful activities of your Geoparks Week 2019:

On 2nd June the Apuan Alps UGGp and the local communities went one step further in the restoration and promotion of the most significant trenches and dugouts in Mt. Corchia area with the opening of new trenches of the Second World War, equipped with panels containing historical, geological and environmental information.

This year, thanks to the collaboration of two historical-cultural associations, the presence of “historical reenactors" wearing the uniform of the American army infantrymen, of the patriots of the “Monterosa” division, made the event even more suggestive.

Moreover, the Geopark launched a new project, in the framework of the disaster risk reduction actions, requesting walkers to pick up any stones they find along their way and place them with care inside the gabion baskets.

This is good practice that helps to preserve the paving and reduces the danger of falling rocks.

This was a special initiative with a strong involvement of the local communities and a large number of presences of villagers, stakeholders and common visitors.

GeoTalks: Science and Cinema

The Geopark hold the 3rd edition of the GeoTalks initiative under the title "Zumaia and the key to the great extinction of dinosaurs. The story behind the history" An event that linked science and cinema with the screening of the short film "The day the Mesozoic died" and subsequent debate with science professionals.

A part of the film was shot in Zumaia, the film follows the clues that led to the amazing discovery that an asteroid hit the Earth 66 million years ago, triggering the mass extinction of animals, plants and even microorganisms.

The screening of the documentary was followed by a debate between two well-known researchers on the K/T boundary.

The attendance to this event is growing year by year and it is becoming the main event of the Geopark week programme.

2. Highlight most successful activities of your Geoparks Week 2019:

Main event:

Official release of the book “Stones Stories, geological chronicles of Beaujolais” – 2nd June

After two years of work with a local author and illustrator, the Geopark release a comic book about the geological history of the territory. The book is articulated around 8 cartoon boards that present the major stages of the geological history. Originally planned for educational use, the project has become a great awareness tool for a wide audience. The book contains explanations about what is a Geopark, about past geological phenomena by providing local examples where it is possible to see geology in the field. A second part provides general contents to better understand essential notions of geology (plate tectonics, rock cycle). But all in a fun and playful way!

Name of Geopark: ...........................................Causses du Quercy UNESCO Global Geopark

Dates of EGN week: ..............................................................may 15th to June 09th

Contact person/e-mail: .......................Agathe Kühnel/akuhnel@parc-causses-du-quercy.org

Special motto of geoparks week: “Geology invites itself into libraries!”

1. Please give the following information:

- number of activities/events during geoparks week: ............................................................. 17
- number of press releases announcing geoparks week events: ...............................................4
- number of printed copies for program flyer/brochure/posters: ..............500 flyers/200 posters (EGN week program was also included in the semestrial Causses du Quercy UGG brochure)
- number of printed articles on EGN week activities: .............................................................. 11
- total number of visitors/participants: .................................................................................. 324 + Visitors to open access exhibitions in 6 partner libraries.

2. Highlight most successful activities of your Geoparks Week 2019:

This year, Causses du Quercy’s Geopark Weeks program was structured around a strong concept based on the local network of Geopark’s partner libraries: “Geology invites itself into libraries!”.

The 6 partner libraries each hosted an exhibition for the general public on various subjects related on local geology, paleontology or other linked topics such as local mining history, the Geopark’s network or Causses du Quercy’s parietal art. Each partner library also hosted a workshop or a lecture on the same theme as the hosted exhibition and various activities were offered “on the field” to complete the program (geobalads, shows, visits....).

This collective mobilization of the partner libraries was a first for the Geopark and very successful, particularly on the following points:
- The visibility and coherence of the program.
- The involvement of the library network not only for the EGN weeks 2019 but more widely on other future projects.

   - number of printed copies for program flyer/brochure/posters: .... 599 brochure / 78 poster A3
   - number of printed articles on EGN week activities:.............................................................. about 15
   - total number of visitors/participants: .............................................................................. about 1000

2. Highlight most successful activities of your Geoparks Week 2019:

   This is the second education of our “Geopark Week” festival which mixes events for the general public, stands at events, special visits, partner events and school activities.

   A very successful activity was a public talk about a high summer farm heritage at the mountain of Nifflon. The site has no naturel water and farmers historically “mined” snow and ice from over-deepened dolines to melt for their cattle. This mountain produced very high-quality cheese and butter. The difficult and labour-intensive activity stopped in the 1970’s however over 50 people came to a talk in the small mountain village of Vailly between a scientist and a farmers descendant. There was a great atmosphere.

Special motto of geoparks week: Viatja pel Geoparc a través del llenguatge (Travel around the Geoparks through the language) – on the occasion of the International Year of Indigenous Languages

1. Please give the following information:

- number of activities/events during geoparks week: 11
- number of press releases announcing geoparks week events: 2+multiple Social Network
- number of printed copies for program flyer/brochure/posters: 1200
- number of printed articles on EGN week activities: 0
- total number of visitors/participants: 400

2. Highlight most successful activities of your Geoparks Week 2019:

The activities are specially designed by the occasion and taking into account the International Year, which was dedicated to the Indigenous Languages. One activity that must be highlighted is the exclusive guided tour in the town of Sarroca that included the combination of three experts: a writer talking about myths, a linguist talking about toponymy and a geologist that linked them all.

The most successful event was the Geofesta Parla Pallarès (Geofest Talk Pallarès – Pallarès is a local dialect). The activity combined the presentation of the 2 new T-shirts of the Cambuleta Association that include a word in Pallarès. The activity was done in the town of Isona and included a gymkhana with local words that was done by the children of school. There was also a concert with local songs and a taste of local products.

2. Highlight most successful activities of your Geoparks Week 2019:

The educational days "Pasa sin huella por El Hierro", created by the Foundation “Telesforo Bravo-Juan Coello”, started with an awareness conference about our geological and archaeological heritage. Then, there were some outdoor activities to restore sites where aggressions to geological heritage had been detected. These activities were always made under environmental agents of El Hierro Geopark surveillance.

These sites were restored, not only by people living on the island but also by tourists.

- total number of visitors/participants:.................................................................5,043

2. Highlight most successful activities of your Geoparks Week 2018:

Alongside a wealth of interesting and fun events including activities for all ages, the new English Riviera UGGp Geopark Associates Partner scheme was launched during this year's festival. Fourteen local organisations signed up to the scheme including Anstey’s Cove Café, Torbay Cleaner Coasts Initiative, Squircle Arts, Doorstep Arts, Paignton Pleasure Cruises, Reach Outdoors, Artizan Gallery, Sea Kayak Torbay, National Coastwatch Initiative, The Sustainable Earth Institute, The Seal Project, The Guardhouse Café, Devon Unique Tours and the Breakwater Bistro. Many of the partners have had an informal relationship with the Geopark for many years so for the first time took up the opportunity to join in with the Geopark Festival celebrations. Artizan Gallery organised a special Geopark inspired exhibition and the Cleaner Coasts Initiative held two beach cleans and a paddle for plastics event whereby the inaccessible rocky shore is cleaned by boat and divers.

2. Highlight most successful activities of your Geoparks Week 2019:

   An informative conference was held by the Geopark in the municipality of Marche-en-Famenne for the premises dedicated to the values of the geopark and its specificities, as well as the EGN/GGN networks.

   The speakers presented the main characteristics of the Geopark with concrete examples in the Marche-en-Famenne region.

   This conference was for our Geopark a way to be in contact with the inhabitants of this municipality, to present our activities and include them in our project. Almost fifty people came. It was also an opportunity for us to highlight our "Geopark Partners" as some of their local products were tasted at the end of the conference. The conference took place in a hotel partner. It was a special week for us because it took place during the european, national, regional elections, it was difficult to bring together all the local actors that we need to set up our projects. Some are postponed to 2020.

2. Highlight most successful activities of your Geoparks Week 2019:

2019 was announced by Visit Wales as the “Year of Discovery” so the Geopark adopted this theme for the ‘Geopark Festival’ or ‘GeoFest 2019’ as it’s billed. Several walks with partner organisations, like National Trust, bringing in new expertise and reaching out to new audiences in new places. Second year of teaming up with Hay Literary Festival to arrange a sell-out geology-themed walk which was enjoyed by 27 people but publicity for which reached a much wider audience through the Literary Festival’s promotional procedure. At the other end of the spectrum, a walk for local graziers across ‘their’ common gave new insights for organisers and participants – and we discovered previously unrecorded and unusual glacial erratics and mosses, scientists and commoners sharing in the excitement. At the annual ‘family day’ at Craig-y-nos Country Park, we promoted the Atlantic Geoparks EU Interreg project in which we are participating.

- total number of visitors/participants: .................................................................... approx. 1500

2. Highlight most successful activities of your Geoparks Week 2019:

The EGN Week 2019 in our geopark had a very diverse program. It happened during almost one month in the geopark and also in Bucharest and Buzău Land Aspiring Geopark. The target groups were also very diverse, from academics to preschool children, from conferences to guided tours or educational workshops.

The two most interesting activities were:

The participation to the European Maritime Day in Bucharest at the Palace of Parliament, where we promoted the geoproducts and the Danube GeoTour project. This was a very high profil event and a perfect opportunity to get to a wide target group which is not usually in contact with the world of UNESCO Global Geoparks.

The traditional Romanian blouse (la) Day was celebrated in the geopark for the 7th year. It brings together producers, young volunteers, tourists and the community around the geopark for a cultural purpose.

2. Highlight most successful activities of your Geoparks Week 2019:

- The 17th National Treck for firefighters occurred in the HPUGGp during the EGW. As they were supposed to run across the Geopark landscapes, it was a great occasion to promote the Geopark existence and activities through an exhibition stand (more than 500 participants). A Geopark discovery hike (underlining deep connections between geology, art and landscapes) was proposed for the family members accompanying the riders with a Geopark partner mountain guide.
- “Art and Geology walk” was proposed by the HPUGGp across the hills surrounding the city of Digne, along the river and its pebbles, to help understanding the landscape history and erosional processes. The walk finished into an art exhibition called “Béton” (Concrete) emphasizing Men impact on environment through rock transformation, concrete use for river weir and embankments and opportunity of concrete recycling … How to broaden the debate with enthusiasts participants despite adverse weather conditions!

2. Highlight most successful activities of your Geoparks Week 2019:

Drilling for the ice ages: a lesson for secondary and primary school students between the ages of 11 and 15.
During the lesson it was about the creation of the UNESCO geopark, soil research was done; the students carried out soil drilling themselves. A hunebed was also visited.

Discover a Pingeruïne: A lesson for secondary school students aged 12 to 15 years.
An excursion to these special remains of the Weichsel ice age.

Presentation by archaeologist Evert van Ginkel: 200,000 years of history of the Hondsrug and its prehistoric residents.
The Hondsrug is in several respects the backbone of Drenthe. Formed in the ice ages, a high and dry beacon for prehistoric residents in a landscape for swamps and stream valleys. Here hunters found their flint, hunebed builders the boulders for their graves, later farmers the favorable transitions between wet and dry.
1. Please give the following information:

2. Highlight most successful activities of your Geoparks Week 2019:

The most visited were two events connected with the 1st World War. In cooperation with the Rapallo Border Society, we organized a guided visit to the railway tunnel, built during the 1st World War but never used. The owner of a small military museum offered guided tours and had about 100 visitors in one day. We are also glad that two events have become traditional. This year we were also part of one bigger event - the 115-year anniversary celebration of the local alpine society. We presented the activities of the Geopark.

2. Highlight most successful activities of your Geoparks Week 2019:

Events for our Geopark Week were quite a few and a lot of our partners contributed with talks, walks and offers in their localities. We had an increase in our annual trail run around palagonite mountain Hjörleifshöfði geosite. We launched our Rural Heritage Hub for the Ruritage project (Rural heritage as a driver for sustainable growth) funded by Horizon 2020 – and a great deal of interested people came to learn all about the project. We hosted our first educational event at our first GeoCenter (not opened at the time) located at Eyjafjallajökull where speakers came and talked about how their line of work relates to Katla Geopark. Nature enthusiasts went on a long hike (15-20 km) with one of our local guides on ancient sea cliffs and many sought a guided tour about volcanoes in Katla Geopark in one of our high-tech interpretive centers, Lava Center.

- total number of visitors/participants: .................................................................................. 322

2. Highlight most successful activities of your Geoparks Week 2019:

We have organised eight events within the scope of European Geopark Network Week 2019. These activities aimed to raise awareness of the geopark among students and teachers mostly living on the territory of the Kula-Salihi Geopark. Our activities, especially for geography teachers, have been very successful and productive. Within the scope of this activity, 25 geography teachers working in schools within the boundaries of the geopark were informed about the purpose and mission of the geoparks. After the meeting, the teachers had the opportunity to visit some geosites in the geopark. Thus, it was ensured that the teachers transferred the information they acquired about the geopark to their students.

Some students have taken to the geopark area in order to protect the natural environment and create a clean environment awareness. More than a hundred students participated in this event, which was also featured in the local press. Participation of well-known people in this activity, such as mayors of Kula and Salihi Districts, increased the visibility of the event.

A Geopark and Geotourism seminar was organized for the owners and employees of the enterprises that are closely related to tourism activities such as hotel, restaurant, souvenir manufacturing and sellers and women's cooperatives. Following the seminar, some geosites that are of touristic importance were visited in the geopark area.

2. Highlight most successful activities of your Geoparks Week 2019:

For the first time in the organization of European Geopark Week, we worked with some activities with a Group for the Defense of the Psychic Patient. They learnt how to cook a “chocolate volcano” and learnt about our geological heritage and how to protect it through volunteer activities. The activity consist in withdrawing names made with stone that destroy the quality of the landscape in the Geopark. The experience was very gratifying for us and they enjoyed a day of creativity in the kitchen eating an authentic volcano and spent another one of outdoor work, in contact with our land.

2. Highlight most successful activities of your Geoparks Week 2019:

(e.g.: program addressed to special target groups, highlight particular events, prominent people participating in events, etc.)

One more year, the activities carried out have aimed to relate the cultural and natural heritage of the Geopark, devising activities for all ages. A good example to start: the seminar “art, territory and community”. Artists and scientists shared experiences for three days. The activities with schoolchildren, the talks and the workshops were very successful, such as that of butterflies and the wolf or talk about The forgotten “camino to Santiago”. The interpreted routes went through environments where the geology, biology and culture heritage were intermingled. Finally, one of the important events, that had a national impact, was the presentation of the candidacy to UNESCO to recognize the manual ringing of bells as intangible cultural heritage, by various Spanish associations supported by the Geopark. Numerous authorities and the local population participated in an emotional and sonorous act because they also rang the bells in many towns of the Geopark.

2. Highlight most successful activities of your Geoparks Week 2019:

With success celebrated Lesvos Island UNESCO Global Geopark the EGN Week 2019. The events were organized by the Natural History Museum of the Lesvos Petrified Forest aiming to raise awareness on the earth heritage and sensitise the public and especially youngsters on the protection and conservation of our natural and geological monuments, the natural hazard risk mitigation, climate change adaptation and familiarization with local gastronomy and local traditions.

Highlight of the EGN Week 2019 in Lesvos was the organisation of the International Intensive Course on Geoparks “Climate Change Adaptation and Geo-hazard Risk Mitigation case studies”.

One of the most successful activities were the organisation of the educational programmes dedicated to the protection of the Petrified Forest, the cleaning and preserving of fossils, the young palaeontologists and the educational activity of simulating disastrous earthquakes at the seismic table of the Museum where many pupils and teachers participated.

Name of Geopark: Marble Arch Caves UNESCO Global Geopark

Dates of EGN week: 27 May to 10 June

Contact person/e-mail: martina.oneill@fermanaghomagh.com/goconnor@cavancoco.ie

Special motto of geoparks week: Unique geological taster of the Geopark!

1. Please give the following information:

- number of activities/events during geoparks week: 6
- number of press releases announcing geoparks week events: 5
- number of printed copies for program flyer/brochure/posters: 5000
- number of printed articles on EGN week activities: 1
- total number of visitors/participants: 200

2. Highlight most successful activities of your Geoparks Week 2019:

Establishment of a new Geopark Event incorporating Geology and Food at new Geopark location – Geopark Gourmet Tour incorporating Lough Oughter Trip to highlight the ribbed moraines and overall geology of this area

Our Cuilcagh Mountain Jeep Safari continue to be extremtly popular where you jump on board one of the Geopark Landrovers and explore the stunning scenery of Cuilcagh Mountain Park. Ranging from the rugged upland cliffs to the weathered limestone landscapes on the lower ground, this safari is a chance for you to experience and explore the patchwork of landscapes found on Cuilcagh Mountain.

Dates of EGN week: .......................................................... may 26th june 10th

Contact person/e-mail: .......................................................... c.lansigu@parcesbauges.com

Special motto of geoparks week:

1. Please give the following information:

- number of activities/events during geoparks week: ............................................................. 10
- number of press releases announcing geoparks week events: ............................................. 3
- number of printed copies for program flyer/brochure/posters: ............................................. 3000
- number of printed articles on EGN week activities: .............................................................. 10
- total number of visitors/participants: ................................................................................... 400

2. Highlight most successful activities of your Geoparks Week 2019:

The “small escape in Bauges”, realized by bike, opened the EGN week by a one day trip in the heart of the geopark to discover landscape and geology. This tour was a trailer for another 4 days bike loop organized during the summer (July 12-15) around the whole massif. An occasion to initiate participants to a several-days trip by bike in autonomy and to build a shared event with the touristic partners.

Name of Geopark: ........................................ Geoparque de la comarca de Molina- Alto Tajo.

Dates of EGN week: ................................................................. May 26th to June 11th 2019.

Contact person/e-mail: ........................................................... geoparquemolina@gmail.com

Special motto of geoparks week: Rocks tell live’s history.

1. Please give the following information:

- Number of activities/events during geoparks week: .................. 31 Activities and events.

- Number of press releases announcing geoparks week events: We prepare press releases throughout the year with each event we do. So that approximately more than 600.

- Number of printed copies for program flyer/brochure/posters: We estimate that during the week we do about 2000 copies for program.

- Number of printed articles on EGN week activities: We make numerous articles.

- Total number of visitors/participants: The estimated number of visitors is 200 persons.

2. Highlight most successful activities of your Geoparks Week 2019:

We make different GEO ROUTES so that we can teach you and know the history of the earth and can touch with your own hands rocks and fossils with millions of years old as well as visit the monuments of our great historical heritage, celtiberian deposits. During this week we make numerous workshops and excursions with the students, so our participation is very active.

On the other hand, we also publish in magazines, edit our posters, brochures...

It is important to have a strategic association so we maintain close collaboration with the rest of Spanish Geoparks. In fact, we developed an exchange of students with El Hierro Geopark. From the Geopark we take care of the preservation of our environment, so in each project that we develop we take into account.

There is a lot of involvement of the associations of the region in the care of the environment. In conclusion, we were promoting tourism in our region.

- total number of visitors/participants: .............................................................................. 11.000

2. Highlight most successful activities of your Geoparks Week 2018:

For the first time, a new event format take place in the Muskau Arch UNESCO Global Geopark. Under the slogan “Move with the Geopark”, a joint sport event for children from german und polish schools, initiated by the UGGps staff, brought around 50 children together and let them enjoy the event with sports and fun. The Geopark’s mascot, Susi the tusk, accompanied the teams during the competitions. By a joint opening ceremony and a joint lunch, the German and Polish students learned more about the other culture and language, for more respect and tolerance and a peaceful co-existence.

Special motto of geoparks week: Landscape Festival 2019

1. Please give the following information:
   - number of activities/events during geoparks week: ............................................................. 15
   - number of press releases announcing geoparks week events: ........................................... 16
   - number of printed copies for program flyer/brochure/posters: ........................................... 100
   - number of printed articles on EGN week activities: .............................................................. 50
   - total number of visitors/participants: ............................................................................ 278,000

2. Highlight most successful activities of your Geoparks Week 2019:

   The most impacting event was no doubt the Flavours of Perdition in the city of Castelo Branco. More than 200,000 participants during two weekends introduced the best local products and the best local gastronomy. Besides technical meetings organized in several events three conferences were hosted including the presentation of the Landscape Virtual Museum and the BioDivSummit Conference – The Origin of Species and Biodiversity that was held in the Living Science Center, Proença-a-Nova. In this conference many invited experts discussed climate change and mass extinctions, causes and possible avenues for nature conservation. The thematic festivals, such as the Flowers and the Cherry and Lemon festivals, are great opportunities to attract thousands of visitors to the villages, to introduce local products and to boost local economies beyond the festival’s weekends.

Name of Geopark: ................................ North Pennines AONB and UNESCO Global Geopark

Dates of EGN week: .................................................................................. 25 May-9 June 2019

Contact person/e-mail: ......................... Naomi Foster naomi@northpenninesaonb.org.uk

Special motto of geoparks week:

1. Please give the following information:

   - number of activities/events during geoparks week: ............................................................... 7
   - number of press releases announcing geoparks week events: ............................................. 1
   - number of printed copies for program flyer/brochure/posters: ............................................... 0
   - number of printed articles on EGN week activities: ............................................................... 1
   - total number of visitors/participants: ................................................................................. ~587

2. Highlight most successful activities of your Geoparks Week 2019:

The most prominent event of the Geoparks Week in 2019 in the North Pennines AONB and UNESCO Global Geopark was making a geological map of the geopark from pebbles. We collected pebbles of the appropriate rock types and drew a simplified map of the geopark next to our Visitor Centre at Bowlees in Upper Teesdale. Over the weekend of 25-26 May, staff and volunteers spoke to all of the visitors between the car park and visitor centre and explained what we were doing, and invited them to help by adding pebbles to the map. To start it off, children from our monthly Discovery Club laid the first few pebbles and found out about how maps are made and used. Over the two days we talked to around 400 people, and many of them got involved by placing pebbles. The map is now a permanent feature outside the visitor centre.

   June 1: Celebration of the first Volcano Day of the EGN at Ipolytarnóc Fossils (the main
gateway to the Geopark, run by the Bükk National Park Directorate), which event was linked
to the EU development open day and geohazard role play programs for Slovak and
Hungarian students, altogether 709 people attended it.
https://rollinginbudapest.com/2019/06/05/the-birth-life-death-ancient-world-time-tracking-
ipolytarnoc-hungary/

Main outdoor and indoor activities during the EGN week:
Guided hiking trips on the Slovak side, crossborder guided tours to geosites of the Medves
Basalt Plateau, special guided, thematic tours on the Miocene Park of the Ipolytarnóc
Fossils;
Discover the Novohrad–Nógrád Geopark. Educational contests with quiz for primary to high
school students, with hiking to the Tachtian diatreme and the Čakanovský profile geosites;
Geopark Family Days and presentations about the traditions and nature at Eresztvén, the
headquarters of the Geopark;
Discover wetland habitats and bird watching programs for families and student classes at the
Miocene Forest of the Ipolytarnóc Fossils;

Exhibition about the best photos of the 4th Crossborder Photo Marathon in Filakovo
(Slovakia) and Salgótarján (Hungary);
Filakovo castle history tours and the miners' life exhibition in the Underground Coal Mining
Museum at Salgótarján;
Exhibition opening and special guiding at the Geo-Wonders House at Sálgóbánya;
Screening the films of the Gödöllő International Nature Film Festival with the motto of Nature
and environmental protection with the power of arts and play;

Special motto of geoparks week: Sustainable Development Goals 8, 11, and 12

1. Please give the following information:
   - number of activities/events during geoparks week: ............................................................. 64
   - number of press releases announcing geoparks week events: ............................................. 5
   - number of printed copies for program flyer/brochure/posters: .......................................... 28,000
   - number of printed articles on EGN week activities: ............................................................. 8
   - total number of visitors/participants: ..................................................................................... 12,000

2. Highlight most successful activities of your Geoparks Week 2019:

The Geopark Festival 2019 was opened with sustainability market attended by approx. 3,500 people. Danish National Television Broadcasting Company participated with a children’s entertainment event, highlighting the importance of non-disposal of plastic into the oceans and saving sea life. Many geopark partners attended with booths at the market.

The following day saw a premiere of a combined light and sound performance by two local artists, envisioning the mythical cult of the Bronze age people, and especially the possible sacrifice of the world famous Sun Chariot.

The last day of the festival hosted a bicycle race in the area, called the Mountains. The race tours the difficult terrain of the geopark and offers climbs worthy of only Tour de France. 1000 participants made around the route.

Special motto of geoparks week: Local and regional geological Highlights

1. Please give the following information:

- number of activities/events during geoparks week: ............................................................. 10

- number of press releases announcing geoparks week events: ............................................. 8

- number of printed copies for program flyer/brochure/posters: ............................................... 2

- number of printed articles on EGN week activities: ................................................................. -

- total number of visitors/participants: ................................................................................... 400

2. Highlight most successful activities of your Geoparks Week 2019:

One of the highlights of the Geopark week was the panel discussion “Leisure and sport in the field of tension between forestry, agriculture, hunting and road maintenance” at the 27th of May 2019. More than 120 participants followed the lively discussion of the 8 people on the podium. The highest ranking representative in the round was the first hunter of Salzburg, Max Mayr-Melnhof. The discussion round represented different interests, besides the hunters, the alpine farmers, the mountain runners, the ski tourers as well as the tourism responsible persons. As a quintessence it is to be noted that a co-operation cannot be excluded in principle, if each user adheres to certain rules of the game, which are necessary in high mountain areas.

- number of press releases announcing geoparks week events: ............... >30 including web
- number of printed copies for program flyer/brochure/posters: ........................................ 1500
- number of printed articles on EGN week activities:.........................................................
- total number of visitors/participants:..................................................Estimated to be more than 10.000

2. Highlight most successful activities of your Geoparks Week 2019:

This year the geopark with the collaboration its partners, the Center of Environmental Education in Anogeia and Cultural Association of the wider area compiled and implemented Two Projects.
The first project includes 4 educational programs for the schools of Mt Psiloritis area in order to motivate students in learning how Geopark combines Natural with Cultural Wealth activating the human factor.

The second project was in cooperation with a cultural association of Heraklion concerning the cycling economy. The main topic of this activity based on an alternative model of socioeconomic structure in Psiloritis area and the participants of this project were from Italy, France, USA and Greece.
The above projects for students and Cycling Economy addressed mainly to locals. The posters and the information concerning the activities were uploaded through social media and official website of Psilortitis Geopark.

2. Highlight most successful activities of your Geoparks Week 2019:

NGOs operators from Italy, Spain, Nepal, Vietnam, Turkey, India & Kenya took part to a geo-trekking at “Rocca di Cerere UNESCO Global Geopark” in the frame of the project “BOCOTO - Boosting Community-Based Tourism and Youth Work for Global Sustainable Development”.

The BOCOTO aims to engage community leaders and organizations to “community-based tourism” and its potential in the youth field. The geo-tour included an introduction to the “Rocca di Cerere UNESCO GG”, a visit to the “Mine Park Floristella” as an example of experiential geotourism. The park “Floristella” is in the heart of the Geopark and it is an open-air museum. It consists in two sulfur mines, now in disuse, and represents one of the most important industrial archaeology site in Italy. Evaporitic rocks belonging to the “Serie Geossoso-Solfifera” outcrop in the area where it is possible to visit a sulphurous spring water and mud volcanoes known as “Maccalube”.

2. Highlight most successful activities of your Geoparks Week 2019:

As usual, Shetland’s EGN week was run in partnership with Shetland Nature Festival. Events catered for a wide variety of interests including geology, wildlife, archaeology, history, arts and adventure sports. A number of our events were aimed specifically at children, including rock pooling and craft workshops, all of which proved very popular.

2. Highlight most successful activities of your Geoparks Week 2019:

The most successful and gratifying activity celebrated during the Sierras Subbéticas EGN Week was, by far, the so-called Geoconvivence. This consisted of the meeting of students from two schools very actively enrolled in the project “I am a Geoparker”. Around 160 primary school pupils joined one morning and shared the knowledge on the Geopark that they acquired during the last academic year in the framework of the project. The geoconvivence included several activities conceived to promote the interaction of pupils and the sharing of geo-information about Sierras Subbéticas. Some of them are: (1) oral and ppt presentations, all exposed by students of both schools, showing the geo-activities and geological fieldtrips they carried out; (2) geo-educative games; (3) a geo-gymkhana; (4) video-recording of small interviews about their geo-experiences in the geopark; and (5) a final flashmob with all the students, teachers and geopark responsible.

"The Magic World of Caves"

A new educational program for the Sitia UNESCO Global Geopark, bringing children into contact with the magical and unknown world of caves, by learning the unknown and inaccessible to many “closed ecosystem”. The aim is to raise children's awareness of the issues associated with these particular natural and geological heritage sites, in order to develop responsible attitudes that will contribute to the protection and sustainable management of the caves. Through interactive games, children are informed about how caves are created, their relationship to humans, their rare and unique biodiversity.

The above educational program was presented at the events of the European Geoparks Week 2019 on the 2nd Children's Festival.

2. **Highlight most successful activities of your Geoparks Week 2018:**

The activities proposed devised annually by Terras de Cavaleiros UNESCO Global Geopark in the European Geoparks Week have been very successful. This year, the proposed activities intended to once again involve the local community and especially the younger individuals. Celebrating children’s day was one of the most important activities this week, because it involved children from many schools of the territory. However, there were also activities related to the Geoheritage, involving native people of all ages, through educative and touristic programmes.

2. Highlight most successful activities of your Geoparks Week 2019:

   How are fairy tales and legends connected to rock formations? Why do different mushroom and plant species grow only on their special kind of soil? Why are the dinosaur tracks at Barkhausen in a steep position in the quarry wall? And why do the Teutoburg Mountains consist of sea sediments? The Geopark Week’s guided tours in particular combined everyday topics with a geologic background. The tours around the dinosaur tracks at Barkhausen introduced children to geologic topics while hiking tours through forest mountain areas invited visitors to slow down the mind and pay attention to details in the geo- and biosphere.

- number of press releases announcing geoparks week events: .................. 40 posts on facebook
- number of printed copies for program flyer/brochure/posters: ............ 7 posters/ 5 brochures
- number of printed articles on EGN week activities: ............................................................... 0
- total number of visitors/participants: .............................................. 13,804 visitors/participants
  - 3504 visitors for the Traveling exhibition – GAIA MEMORIES (Greece and Cyprus co-operation on focused geotourism), Nicosia city
  - 100 athletes to the Running event ‘Madari Mountain Madness 2019, Run along impressive sheeted duke complex’
  - 200 participants to the 2nd International Conference of UNESCO Global Geoparks GREECE – CYPRUS. The conference is organized by the Geological Survey of Cyprus in collaboration with Cyprus National Committee for UNESCO, the Greek Geopark Committee and Troodos Development Company-management body of Troodos UNESCO Global Geopark, Nicosia city at Ministry of Finance
  - Almost 10,000 visitors to the GEOPARK’S FESTIVALS

2. Highlight most successful activities of your Geoparks Week 2019:

All the events of our geopark week were very successful due to the promotion and the collaboration with the communities and the stakeholders of Troodos Geopark. Firstly, the travelling exhibition GAIA MEMORIES (Greece and Cyprus co-operation focused on geotourism) was a very interesting tool in order to share the idea of the Greek Geoparks and the Geoparks’ Network in our island. We have received many interesting and positive comments from the visitors who also choose to visit Troodos Geopark Visitor Centre after seeing the exhibition in the capital city of Cyprus. The running event ‘Madari Mountain Madness 2019, Run along impressive sheeted duke complex’ is one of the most well-established and well-organised running events in Cyprus that is growing each year. The 2nd International Conference of UNESCO Global Geoparks GREECE – CYPRUS was also a great success as it was the first one in Cyprus. Troodos Geopark Festivals 2019 started also in May 2019 and they will be finalised in November 2019. Each village has a different thematic festival regarding the gastronomy & culture of the Troodos Geopark area.
