Special motto of EGN Week (if any): Vote for Nature

#### 1. Please give the following information:

- number of activities/events during EGN Week: ..... 7
- number of **online** activities/events during EGN Week: ..... 0
- number of press releases announcing EGN Week events: ..... 12
- number of printed copies for programme flyer/brochure/posters: ..... approximately 120
- number of printed articles on EGN Week activities: ..... 6
- total number of visitors/participants: ..... approximately 250
- total number of participants of the **online** events: ..... 0

#### 2. Highlight most successful activities of your EGN Week 2024:

##### **“Festa della Geologia” (“Geology Festival”) in Equi Terme di Fivizzano (18-19 May)**

Over a period of two days, the festival dedicated to geology took place with several guided excursions and visits, experience labs, seminars, food and drink, activities, and adventure experiences, for young and old.

##### **“Health comes by walking...” a trail hike from Canevara to Antona (Massa) (2 June)**

An initiative conceived by the Italian League for the Fight against Cancer and organized with the Apuan Alps UGGp and the Italian Alpine Club Section of Massa, under the patronage of the Province of Massa-Carrara and the municipality of Massa. It had the aim of raising awareness of the importance of walking in the mountains, including as prevention against oncological diseases. The event attracted around 100 participants.

All the EGN week activities and events have been promoted as part of the GGN's 20th anniversary celebrations.

#### 2. Highlight most successful activities of your EGN Week 2024:

This year the Azores UNESCO Global Geopark partnered with several entities to give light to the EGNWeek 2024 in all the 9 islands of the territory, creating the Campaign – Pedaços de Mar e Ambiente. This campaign highlighted UNESCO Global Geoparks through science communication activities targeted to the general public and school public. The campaign was extended until the 8<sup>th</sup> of June integrating World Environment Day (5<sup>th</sup> of June) and World Ocean Day (8<sup>th</sup> June). During the EGNWeek 2024 we have also with other Geoparks in the world in online events like the Webminar with ElHierro and the exchange with Ngorongoro Lengai.

## European Geoparks Week 2024

- number of printed articles on EGN Week activities: ..... 1
- total number of visitors/participants: ..... 204
- total number of participants of the **online** events: ..... 0

#### 2. Highlight most successful activities of your EGN Week 2024:

One of our most popular activities during this year's European Geoparks Week was our guided geotour on International Volcano Day (1 June). This time, we explored the rich volcanic heritage of the Tihany Peninsula with many persistent and curious participants. The area is not only famous for its varied volcanic rocks and unique cultural heritage, but it is also the home to Hungary's first nature trail, named after geologist Lajos Lóczy. The hike was called "Grand Tihany", as the more than 15 km long tour covered the entire peninsula, stopping at the Lavender House Visitor Centre, the Eastern Gate of Bakony–Balaton UNESCO Global Geopark, which not only presents the aromatic plant and its traditional cultivation and processing, but also the volcanic evolution of the area.

- total number of visitors/participants: ..... 650
- total number of participants of the **online** events: ..... 0

#### 2. Highlight most successful activities of your EGN Week 2024:

In 2024, the legendary Spanish public television programme "El hombre y la Tierra" (Man and the Earth) hosted by naturalist Félix Rodríguez de la Fuente will be celebrating its 50th anniversary. To discuss his legacy, a conference was organised to which we invited his daughter Odile, where we could listen to and see excerpts of interviews and photos of the programme and its protagonist. GeoTalks initiative consists of combining science and art and is consolidating as a expected event in last Geoparks weeks. The initiative was a total success among the local population, who filled the cinema in Zumaia, which helped to spread the conservation message of Geoparkea a little further.

#### 2. Highlight most successful activities of your EGN Week 2024:

The Glay quarry festival took place on May 25<sup>th</sup> and 26<sup>th</sup> in this beautiful former golden stone quarry in the South of our Geopark. It was the occasion for sculptors, engravers, stonemasons and other craftsmen to show their know-how. Many booths were there to present the Geopark and its geology, the biodiversity of this area and so on. Activities included learning how to restore a dry-stone wall, stone carving or gold panning. Around 1 500 people took part in this event.

## European Geoparks Week 2024

### Report

Name of Geopark: ..... **Beigua UNESCO Global Geopark, Italy**

Dates of EGN Week: ..... 18/05/2024– 05/06/2024

- number of printed articles on EGN Week activities: ..... 1
- total number of visitors/participants: ..... 212
- total number of participants of the **online** events: ..... 102 participants

#### 2. Highlight most successful activities of your EGN Week 2024:

**“TASTE OF GEODIVERSITY”** A panoramic walk with the Guide took hikers to Val Gargassa. On the way back from the hike, we stopped at Agriturismo Monterosso, the cheese farm where chamois goats are reared and from whose milk so many Gustosi per Natura cheeses are made, and met Alice, who showed us her hives from which Beigua honey is made. The excursion also aimed to explore the theme of coexistence between human activities and the presence of the wolf, with mention of the Life Wolfalps EU Project. Municipality of Rossiglione

**“GEOTREKKING: THE LERONE VALLEY”** When the guide is also a geologist, the excursion becomes an in-depth study of the geological features of the Geopark. This time we started from Curlo for a ring trekking to the discovery of still wild corners: we crossed the Lerone Forest, with its small lakes, waterfalls, gorges and rugged rocky ridges to show the geological features of the Geopark. Arenzano Municipality

**“ALTA VIA TRAIL IN BLOSSOM”** our ‘classic’ spring hike: an explosion of colours and scents welcomed hikers along one of the most scenic parts of the Alta Via dei Monti Liguri, a spectacular show that every year fascinated us with new nuances and glimpses. We were accompanied by an exceptional guide, Stefano Marsili a botanical expert who revealed to us the curiosities and peculiarities of Beigua’s characteristic blooms. Cogoleto Municipality

**“GEOTREKKING: REMAINS OF ICE AGES IN BEIGUA GEOPARK”** On the eve of the warm season: what better occasion to talk about when it was much colder? During the excursion we visited some of the most important geosites of the Beigua Geopark and we observed two particular formations, the blockfields and blockstreams, originating in the remote past from the action of ice. An excursion dedicated to the theme of climate change. Sassello Municipality

**GUIDED TOURS OF TIGLIETO ABBEY:** Appointment with the Beigua Park Guides for a visit to the Church, the Armarium, the Chapter House and the cloister of the Cistercian Abbey S. Maria alla Croce di Tiglieto, which in 2020 celebrated 900 years since its foundation. Tiglieto Municipality

**ON LINE ACTIVITIES:**

**Webinar: “INTERNATIONAL DAY OF EUROPEAN PARK: Spring blooms in the Beigua Geopark”** A webinar dedicated to discovering spring blooms held by Stefano Marsili, Park Guide and botanical expert.

**Webinar: “BEIGUA GEOPARK GLACIAL EVIDENCE”:** An afternoon with our geologist guide to discuss climate change and evidence of glaciation in the Beigua Geopark.

**Workshop: “INTERNATIONAL ENVIRONMENTAL DAY: Who is afraid of bats?”**  
Let's discover together with our guide, an expert naturalist, all the secrets about bats so that we are not afraid of them but learn to love them and understand their important role in biodiversity.

- total number of participants of the **online** events:.....0

2. Highlight most successful activities of your EGN Week 2024:

We organized a two-day workshop called "Bat voting and use of equipment for recording and analysing votes". The workshop was a part of the "Still Water Revival - restoration and preservation of small freshwater ecosystems of karst mountains in the Mediterranean" project. Preservation of puddles and freshwater ecosystems is also of great importance for bats, which are an essential part of food chains and help control the number of insects. As part of the workshop, the participants had the opportunity to learn about standard bat research methods and equipment for monitoring bat votes and vote analysis. After the collected theoretical knowledge, the learned recording methods were applied in the field. On the second day of the workshop led by bat monitoring experts, the data collected in the field was analysed. This two-day workshop was attended by representatives of mountaineering and speleological societies from the Geopark area.

- total number of participants of the **online** events: ..... none

#### 2. Highlight most successful activities of your EGN Week 2024:

The activities that took place during EGN week were addressed to students, as well as to teachers, tourists and visitors. The events were focused on raising awareness about the Geopark's natural and cultural heritage and on promoting a sense of ownership for younger generations through interactive presentations and classes, guided tours, exhibitions, seminars, educational activities in schools and various workshops. A few highlights include interactive indoor and outdoor classes focused on geological heritage, guided tours led by the Geopark team to the Mud Volcanoes, Rock-Hewn Dwellings and Salt domes, educational seminars attended by students and teachers, workshops focused on local crafts, and movie projections. The events were organised and moderated by the Buzău Land UGGp team, together with professors from several educational institutions, and by various partners like the National Peasant Museum, NGOs and High schools, and were attended by 498 participants.

- total number of visitors/participants: ..... 4032
- total number of participants of the **online** events:..... 1168

2. Highlight most successful activities of your EGN Week 2024:

On June 1st, we attended the Bükkábrány Ancient Tree Festival, a local event celebrating the well-preserved Miocene swamp cypresses (*Taxodium*). The festival featured performances by local folk dance groups and folk song circles, showcasing the region's cultural heritage. The event's notable attendees included mayors and representatives from the municipalities, furthermore renowned Hungarian performers entertained the participants.

Attendees had the opportunity to taste local delicacies such as Csernely perogies and strudel, which were highly appreciated for their unique flavours. Additionally, the festival hosted our geopark's traveling exhibition, providing interesting insights into the area's geological values and natural treasures. Overall, the event offered a rich program and highlighted the strong sense of community, making it a memorable experience for everyone involved.

- total number of participants of the **online** events: .....63

#### 2. Highlight most successful activities of your EGN Week 2024:

The two activities with the greatest success have been the hiking and interpretation routes, highlighting the two GeoRoutes (one through the interior and the other along the coast), the bird interpretive route and the Geopark coastal heritage route.

Also worth highlighting are the workshops held in schools on the minerals and rocks present in the territory. But without a doubt, the most special event has been the 1st anniversary as a UNESCO Global Geopark, with the participation of members of the Scientific Committee and also (virtually) some important people for us in all this process: one of the two UNESCO auditors who visited us last year, Chris Woodley Steward, José María Barrera as representative of the Spanish Forum and Sophie Justice from the EGN. Furthermore, taking advantage of the occasion, special recognition has been made to the "Entidade Amiga" associations, ambassadors of the Geopark since its inception.

#### 2. Highlight most successful activities of your EGN Week 2024:

Night is a time for contemplation that has fascinated mankind since time immemorial. We know more about landscapes during the day than at night... Left in the dark, forest, agricultural or natural landscapes remain mysterious places. The Geopark has come up with a new kind of discovery trail, to be explored after dark. Starting in the village of Corn, there are 5 stops along the way, lasting between 1,5 and 2 hours, where you can immerse yourself in the nocturnal landscapes. As part of Geoparks Week, the trail was inaugurated in the presence of the partners, and a visit was offered at dusk by the Geopark team.

2. Highlight most successful activities of your EGN Week 2024:

The Geoparks Week 2024 has been a highly successful series of events. We organized engaging workshops for children and families, literary gatherings, storytelling sessions at public libraries, and numerous field excursions that drew significant participation. The most successful events have been excursions such as exploring the "Torrent de la Sala" biodiversity, the night guided visit in "El Toll" caves in Moià with an escape room, and the excursion to explore the historical and geological heritage from El Pont de Vilomara to Viladordis. These activities attracted large crowds and widespread interest, highlighting the diverse natural and cultural heritage of our geopark. Another highlight was the scientific talk about the salt mines of Wieliczka (Poland), which captivated attendees with its fascinating insights.

#### 2. Highlight most successful activities of your EGN Week 2024:

On Saturday 1 June Cuilcagh Lakelands UNESCO Global Geopark held a Family Geoparks fun day in Killykeen Forest Park with lots of geological related activities for all ages. The event was focused on inclusiveness and accessibility, with activities for all ages and abilities. Geopark staff delivered a talk on fossils on the island of Ireland, and participants were able to create their own fossil to take home. Geopark staff also delivered a geological boat tour on Lough Oughter, showcasing ribbed moraines, drumlins and other geological features as well as taking in the wonderful biodiversity of this unique landscape. Other activities included fossil and kite making, water activities, a caving virtual reality experience, rocket launch workshops, mini beast hunts, geological boat tour and more.

- total number of participants of the **online** events:..... 0

2. Highlight most successful activities of your EGN Week 2024:

Geopark de Hondsrug organized two successful Geopark Week activities in Noordlaren, including a lecture and field study, which drew a large audience.

Physical geographer Anja Verbers gave a fascinating lecture on collapsed pingo's and blow-out bowls on May 30th at Noordlaren's community hall. These landscape characteristics are extremely prominent on the Hondsrug. The room was packed with over 40 attendees, and local community gained knowledge about the most recent findings in collapsed pingo's research, as well as the necessity of protecting them.

On June 1, 12 participants took part in the 'Investigate a collapsed pingo yourself' field survey, which was also led by Verbers. During this activity, participants had the opportunity to observe firsthand in the field how the investigation of a collapsed pingo with drilling is carried out.

Both initiatives demonstrated a strong interest in the geological history of the Hondsrug and the preservation of this unique landscape.

#### 2. Highlight most successful activities of your EGN Week 2024:

This year, most of the activities were focused on educating the youngest students, socializing and making contact with children from preschool institutions and school-age children with educators and volunteers from the Romanian Hatteg Geopark.

As part of cooperation with the Romanian Hatteg Geopark and Fetislam Fortress, the workshop "Back to the Age of Dinosaurs" was held for second-grade students of Elementary School "Vuk Karadžić", Kladovo. The main goal was to familiarize the youngest with the term geopark through interactive workshops.

Thank you for your cooperation.

As part of marking the EGN Week, as well as the 50th Anniversary of the existence of the Đerdap National Park, the opening of the exhibition "Wildlife Art", diplomas "Uže, Ljubisa Mick Marinović. Through 25 photographs, Marinović express his love for nature by showing the animals that live today on the territory of Đerdap UGGp, but also those that no longer exist, such as bison.

Name of Geopark: ..... English Riviera UNESCO Global Geopark, UK

Dates of EGN Week: ..... 25 May to 31 May

Contact person/e-mail: ..... m.border@englishriviergeopark.org.uk

Special motto of EGN Week (if any): Geopark Discovery

#### 1. Please give the following information:

- number of activities/events during EGN Week: Eight events available everyday, one event was available twice during the week and another available three times, plus there was a further 11 individual events
- number of **online** activities/events during EGN Week: ..... 0
- number of press releases announcing EGN Week events: ..... 1
- number of printed copies for programme flyer/brochure/posters: 0 – marketing is now focused online via website and socials
- number of printed articles on EGN Week activities: ..... 2
- total number of visitors/participants: ..... 1665
- total number of participants of the **online** events: ..... 0

#### 2. Highlight most successful activities of your EGN Week 2024:

This year's festival saw the trial of new Geopark Discovery Experiences being developed thanks to a UK Government funding scheme called UK Shared Prosperity funding which is creating a suite of authentic and quality experiences to act as introductions to the Geopark led by people who are passionate and knowledgeable about what makes this place one of 'Earth's Extraordinary Places!'

The Geopark was able to support a group of local men, who have formed a sea shanty band (initially, this was an informal self-support group post covid) to gain public liability insurance now enabling them to perform officially. Their performances are heartfelt and always well received. They performed at a local hotel, using a smugglers tunnel that runs from the building to the beach.

Engagement was lower than normal this year due to poor weather, in particular an easterly, offshore wind, which meant many of the water based events could not operate and events had to be cancelled.

The Geopark has partnered with the municipality of Durbuy to host the 9th International Symposium on Monumental Stone Sculpture, featuring 12 international artists. Access was free, in the open air, allowing visitors to discover the work of the sculptors and the evolution of their works over the two weeks of the symposium. The Geopark had a stand on the theme of discovering the rocks that make up the Geopark Famenne Ardenne territory, their history, their uses and how to recognize them. A visit to a active limestone quarry was also on offer. The collaboration with the municipality helped to raise the profile of the event, which will be repeated in two years' time.

- number of printed articles on EGN week activities: ..... 0
- total number of visitors/participants: ..... 1 000 (including students)

#### 2. Highlight most successful activities of your Geoparks Week 2024:

The focus during the EGN-week is to spread knowledge about our Geopark and UNESCO Global Geoparks in Europe and other parts of the world to local people and students. We want to enhance the understanding of the value of nature and value of this UNESCO site designation.

Free guided tours for local people and tourist were even more popular this year and attended by a lot of visitors.

The guided boat trip "Nature- and culture histories of our coastline with special emphasis on the geological history" was so popular that we had to set up a new boat trip in August.

Educational program for schools in the Geopark, class from several schools attended this one-day experiences of the EGN-week. The theme was UNESCO Global Geoparks, and we extended our regular program for schools "geologist and scientist for a day", and had even more schools attending than usual this extended week.

- total number of visitors/participants: ..... 233
- total number of participants of the **online** events: ..... 0

#### 2. Highlight most successful activities of your EGN Week 2024:

Among different activities, the Haute-Provence UNESCO Global Geopark organized the "through time visit" of a small village called Vaumeilh. Strolling through the narrow streets with stone houses, searching for castle remnants, took us into a long way back to Middle Ages. As soon as the top hill ancient tower was reached, landscape reading allowed us to continue our journey back to the last glacial intrusion, and even further back to the Jurassic Ocean responsible for the sedimentary rocks all around us. Finally, the direct encounter with each kind of stones brought a firm grasp of the geological history. Inhabitants as well as visitors now have a different feeling when seeing pebbles or marls in the landscape! Biodiversity was also in the spotlight with enthusiastic guides who provided plenty of little secrets through the Butterflies Garden of the Musée Promenade (Geopark Visitor Center) during both week ends.

- total number of visitors/participants: .....400
- total number of participants of the **online** events:.....0

#### 2. Highlight most successful activities of your EGN Week 2024:

In 2024 there were 4 events cancelled and 2 postponed because of the bad weather. However, there were few very successful events carried out. The most successful this year was the “Meeting of three generations in Mejca” in co-organisation with the Idrija retirement home. Together with volunteers we walked around 50 retired. The kids from kinder garden Idrija joined us this year and prepared a small singing programme for retired, which accepted this with joy and thankfulness. All together 200 people participated in this event.

Another successful event was also the Hiking and outdoor concert by Žiga Lakner in Šturmajce homestead, which was special, because it was accompanied by an outdoor concert in front of the homestead, together with the local delicacies and wine tasting. Approximately 50 people joined this hiking adventure.

2. Highlight most successful activities of your EGN Week 2024:

The EGN Week went very well this year at Katla, and the highlight is most likely the reveal of the new Víkurfjara beach project signs at Icewear in Vík. The project is a joint research project between the Geopark and the elementary school in Vík, where students measure the beach in front of the town. The signs inform visitors about the project itself, the aims of the measurements by the students, the methodology, why we are measuring the beach and photos of the students working on the project. The signs have increased the attention that the project gets.

2. Highlight most successful activities of your EGN Week 2024:

Agios Thomas Geosite

The event took place at the Agios Thomas Geosite which is a very rich fossiliferous place. The purpose of the action was to help children understand the significance of fossils and how fossils can connect different geoparks around the word. Fossils provide invaluable insights into Earth's history, including the evolution of life forms and changes in environmental conditions over geological time. Additionally, they leading to new discoveries and a deeper understanding of Earth's history. Therefore, through fossils we can recognize common elements among different geoparks even if they are miles apart.

#### 2. Highlight most successful activities of your EGN Week 2024:

**This year, EGN Week 2024 featured 3 events**, in different locations, in different forms, but relating to the same subject - geology, history and biodiversity in the Land of Extinct Volcanoes Geopark. The events showed how the diversity in the Geopark intersects to create one whole.

“**The Geological and historical tour around Wielisławka Mountain**” took place on 17 June 2024 - Wielisław Organ at the foot of the Wielisławka hill above the Kaczawa River is one of the most famous geological sites in the region, visited since the late 18th century and protected as a natural monument. In the excavation of the former quarry, rhyolites, silica-rich volcanic rocks from the Permian period, are exposed. They are regularly cracked, resembling a large inverted fan. During the tour, participants learnt about the geological curiosities of the geostation, found out about the mining history of the site, learnt about the legends associated with it and discovered the unique biodiversity together with a unique guide.

A lecture entitled “**Geology, history and trees**” took place on 19 June 2024, during which an arborist and dendrologist talked about how the biodiversity in the geopark is powerful thanks to our complex geological past. He also talked about the fact that, as humans, we have contributed to this, over the years gardens, parks and avenues have been created. Each era was governed by its own laws, had different fashions, ideas, visions. There is no shortage of monuments in our area, of course, and therefore no shortage of tree-related curiosities.

On 23 June 2024, a **concert** was held within the historic walls of the **14th century church of St. Luke the Evangelist in Ruja**. Before the concert, participants were able to take part in a

guided tour of the church. Among the things to admire were the wooden altar from 1710, the Gothic font and the organ prospectus in Baroque style.

The "InTune" ensemble is made up of Aleksandra Radwańska (Baroque violin) and Urszula Jasiecka-Bury (harpsichord/organ), who, by playing their concert, allowed the inhabitants of the Geopark to discover this magnificent place, located on the edge of the Geopark.

On Sunday, May 26th, the inauguration of Alkkianvuori Health Forest, European Geopark Week, and the 20th anniversary of the Global Geoparks Network were celebrated with over 50 participants.

After the introductions of the Geopark, the Geopark networks, and the area's geological, natural, touristic and well-being features, we set off to explore the features of Alkkianvuori Health Forest and the local birdlife. During the couple of hours of excursions, we admired the diversity of Alkkianvuori as a natural and geological site and listened to the typical birds of the area.

Alkkianvuori attracted interest, and among the participants were residents who had lived in the area all their lives but were visiting Alkkianvuori for the first time. They were distributed the hiking and cycling guides and brochures of the Geopark. Many of them promised to return to Alkkianvuori with their own guests.

### Report

Name of Geopark: Maiella UNESCO Global Geopark, Italy

Dates of EGN Week: 18<sup>th</sup> May - 2<sup>nd</sup> June

Contact person/e-mail: Maria Peroni [maria.peroni@parcomaiella.it](mailto:maria.peroni@parcomaiella.it); Violetta De Luca [violetta.deluca@parcomaiella.it](mailto:violetta.deluca@parcomaiella.it)

Special motto of EGN Week (if any):

**Not just rocks...**

#### 1. Please give the following information:

- number of activities/events during EGN Week: 3 (Short description below)

1. **Presentation to the public of the "Nuovo Cammino sulla Linea Gustav"**, a geotrail that retraces the route of the "Gustav Line" (German defensive system created at the end of 1943 to counter the advance of the allied forces) and **rock workshops for children** within the initiative "Art Bike & Run + Wine", regional event open to all dedicated to sport, art and food (18<sup>th</sup> May). Through this new path, born in collaboration with the Local Action Groups Costa dei Trabocchi and Maiella Verde, it is possible to understand how the geomorphology of the territory, the vegetation and climate in these places influenced the development of military operations during some battles of the Second World War.
2. **Activities with 2 classes of a primary school** to discover the river environment and its vegetation (23<sup>rd</sup> May). The activity took place both in class (introduction on the geopark and the theme) and outdoors along the Orta River. The children also played with natural elements found on site.
3. **"Maiella madre", an experiential walk in the Botanical Garden "Daniela Brescia"** dedicated to the richness and the particularities of the Maiella's flora (especially the officinal one), with a focus on the links between plants and geology (26<sup>th</sup> May). The participants of the activity, organized in collaboration with FAI (Italian Environmental Fund), have learned not only about plants but also about rocks and fossils and have discovered legends and curiosities related to them.

- number of **online** activities/events during EGN Week: 2 (Facebook posts)

- number of press releases announcing EGN Week events: 0

- number of printed copies for programme flyer/brochure/posters: 0

- number of printed articles on EGN Week activities: 0

- total number of visitors/participants: about 100-150 visitors/participants

- total number of participants of the **online** events: 0

#### 2. Highlight most successful activities of your EGN Week 2024:

Among the activities organized during EGN Week, the one that aroused most interest was perhaps the workshop attended by many children who with their families participated in the large event organized by the Abruzzo Region on the coast. It was an opportunity to present the Maiella Geopark but above all make them know with all senses various types of rocks.

It is also worth mentioning the initiative with seminars, excursions, activities with schools and much more organized in collaboration with two Geopark's municipalities to tell the virtuous experiences of biodiversity protection that contribute to the revival of the economy in the inland areas (17<sup>th</sup>-19<sup>th</sup> May). Activities carried out in the framework of the event "Palena... il paese delle orchidee".

Birgit Kausch ([birgit.kausch@naturpark-mellerdall.lu](mailto:birgit.kausch@naturpark-mellerdall.lu))

Special motto of EGN Week (if any): the EGN Week did not have a specific motto / slogan, it was promoted under “Mëllerdall Days” and included different types of physical events related to our geological, cultural and intangible heritage

#### 1. Please give the following information:

- number of activities/events during EGN Week: ..... 10
- number of **online** activities/events during EGN Week: ..... 1
- number of press releases announcing EGN Week events: ..... 1
- number of printed copies for programme flyer/brochure/posters: ..... 200 Posters, 100 Flyers
- number of printed articles on EGN Week activities: ..... 7
- total number of visitors/participants: ..... 650
- total number of participants of the **online** events: ..... 84

#### 2. Highlight most successful activities of your EGN Week 2024:

The EGN week began with a family rally, where the Mëllerdall UGGp, in collaboration with other stakeholders, set up stands about nature-related themes. The event targeted families with children and attracted over 300 people. The closing event was a picnic featuring regional products at Larochette Castle, a main regional attraction. For the first time, locals and visitors could discover the region's unique products in an exceptional setting. Free guided tours of the castle were offered and an artist made portraits of the visitors. As it was our first time organizing this event, we had a maximum capacity of 100 people. However, a survey showed that the event was greatly appreciated, with participants wanting it to be a consistent part of EGN week. The 2024 EGN week also included a collaboration with our region's only cinema, one of the oldest in the country. It screened a movie about our UNESCO-classified Hopping Procession and another about the dangers of green algae. Other events included a bike tour connecting geosites and guided hikes, open to locals and tourists. The online activity was a quiz about our Geopark which was available in 4 languages and programmed by a group of computer science students. Participants were able to win great experiences in the Mëllerdall UNESCO Global Geopark.

- total number of participants of the **online** events: ..... 0

#### 2. Highlight most successful activities of your EGN Week 2024:

During the European Geoparks Week 2024, four events were held in our Geopark area. The most impressive of these was the event titled "Meteora Sound and Light," featuring illuminated balloons and musical performances against the stunning backdrop of the Meteora landscape. This unique event aimed to promote the landscapes of the Meteora – Pyli Geopark and received an enthusiastic response from both locals and tourists. However, the most moving event was the revival of old traditional activities. The older generation passed on to the children the culture, traditions, spirit of cooperation, social interaction, morals, and values of the Geopark area through play. The aim was to convey the message that culture is a fundamental element of our people's identity, transmitted from generation to generation through the experiences of the "significant others" in their lives. The students played traditional games from their grandparents' era with the elders and enjoyed themselves wholeheartedly. Then, everyone danced together in a large circle, performing traditional dances from our region.

#### 2. Highlight most successful activities of your EGN Week 2024:

The XXIV Feira Raiana takes place in Idanha-a-Nova, bringing together national and international participants to celebrate sustainability, culture, and diversity. Over the course of 10 days, the entire Fair was based on environmentally friendly practices, with a strong focus on sustainability. Idanha is a territory with three UNESCO designations – Creative City of Music, Geopark and Biosphere Reserve – and awarded as the Best Bio-Region in Europe in 2023, by the European Union. It is in this context that the 2nd World Congress of Bio-Regions took place, which included participants from all over the world, with emphasis on Asia and Europe. However, representatives from the 5 continents of the Network of 1300 Bio-Regions (Global Alliance Organic District) were present, involving entities from the agro-biological sector. The Agrifood Summit Powered by SFT-EDIH, an event that promotes the sharing of knowledge and the promotion of synergies in the agri-food sector for a more innovative and sustainable food chain, aimed at all agriculture enthusiasts and food. The Fair featured the Celebration of the Centenary of Biodynamic Agriculture, which was started by Rudolf Steiner, in 1924, in Germany. The Doan Meeting – Drylands Organic Agriculture Network took place, an international event that brings together experts, farmers, and political decision-makers dedicated to the development and promotion of organic agriculture in arid and semi-arid lands. Opening the Fair, the seminar of the Local ODS Municipal Platform - Sustainable Development Goals also took place.

- total number of participants of the **online** events: .....N/A

#### 2. Highlight most successful activities of your EGN Week 2024:

This year was the first North Pennines NatureFest, coinciding with EGN Week. There were 24 events, hosted by the North Pennines National Landscape and Geopark Team, and partners such as RSPB, Natural England and South Tynedale Railway. Events included activities for families, guided walks, talks, arts workshops and volunteering tasks. All of these were themed around local nature, including peatlands, geology, animals, trees and meadows. A particularly notable event was a film screening of 'Six Inches of Soil', followed by a discussion. Six Inches of Soil follows the inspiring story of British farmers standing up against the industrial food system and transforming the way they produce food – to heal the soil, benefit our health and provide for local communities. This was hosted in a village hall in an evening and attracted around 50 people.

Our brand new Geotour for 2024 was along the North Coast June, and was full to the brim! Following on from previous years successful Geotours that guide guests through an overview of the geology and landscape of the whole Geopark, a specialised tour focussing on the north coast was developed and promoted. We worked in partnership with one of our local business Ambassadors, Bjorn Hardarson, to lead the tour along with our Geologist, Pete Harrison.

Of course our weather can be challenging and during the week it often felt like summer had disappeared! However the scenery was dramatic, the company excellent and the geology amazing. We are planning to offer this Geotour again next year, not least because our efforts to get to Cape Wrath, the most north westerly point of our Geopark, and only accessible by ferry, were thwarted by the unseasonal weather.

Between May 18 and June 2 the EGN Week program cavalcade of the transnational Novohrad–Nógrád Geopark (within it the Pentecost) provided plenty of interesting events. Several stakeholders joined to the celebrations, like the Bükk National Park Directorate beside the geopark headquarters. For example at the paleontological center of the Geopark, at Ipolytarnóc Fossils 4 857 visitors attended the EGN Week programs. Just on the Volcano Day (June 1) 446 people visited the Site.

An educational competition between Slovak and Hungarian schoolchildren was held at Baglyaskő geosite and Geopark Visitor Center on May 28.

Beside the crossborder events the international cooperation was also extensive during the EGN Week.

It included the Visegrad Group Geoparks' (Czech, Slovak, Polish and Hungarian) second meeting between May 13-15 in the Czech Republic and the online meeting of the transnational UNESCO Global Geoparks' WG, which took place on May 30.

This edition of the European Geoparks week has been named The Earth Memory and has been particularly dedicated to Geology. Activities have been carried out for all audiences, from a presentation on the formation of the double discordance of Collegats by Professor Josep Anton Muñoz from University of Barcelona to a story for children to discover prehistory with the lady of the mountains, or through an urban geology outdoors presentation relating the building materials in a medieval village with the geological context around. One of the highlights of the EGN week was a fieldtrip on the Isona tufa mounds with over 70 participants followed up by a posthumous tribute to the figure of Doctor Rogelio Linares, a reference geomorphologist in the study of these landforms. Furthermore, we had guided visits in museums and the presentation of a new fossil collection, and fieldtrips organized to emblematic Geopark sites.

We would like to highlight the successful visit of the Vis Archipelago UGGp, during which children from the island of Vis performed a play for their peers at a local school. Through the play, they showcased the traditions of the island of Vis. The teachers and children from the geopark also had the opportunity to explore all the interesting features and beauties of our geopark. Among other things, they visited the House of the Pannonian Sea in Velika, the Geo-info Centre in Voćin, and the Park Forest Jankovac. During the visit, future collaboration was agreed upon, not only between the two geoparks but also between the local schools, with a return visit by schoolchildren planned for next year to the Vis Archipelago Geopark.

#### 2. Highlight most successful activities of your EGN Week 2024:

On May 22<sup>nd</sup>, Platåbergens Geopark arranged a “Walking lecture” at the sub-Cambrian peneplain, at Nordkroken, just east of Mt Halleberg. Nordkroken is not just a great place to swim in Lake Vänern. There are also very distinctive, perfectly flat areas of exposed rock here – in contrast with the steep rock walls nearby.

These flat rock surfaces were formed more than half a billion years ago. The bedrock had previously been weathered and eroded to create the flat landscape that we see now. This flat surface is called the sub-Cambrian peneplain and can be seen especially clearly here at Nordkroken.

To make the arrangement more sustainable, we had adjusted the time of the event to correspond with the local bus schedule, making sure that everyone who had the opportunity could participate by taking public transport. The event had 27 participants.

#### 2. Highlight most successful activities of your EGN Week 2024:

Geopark Ries tour guides celebrated several momentous anniversaries at popular regional markets during EGN Week 2024: the 15<sup>th</sup> anniversary of their certification as Geopark Ries tour guides and 20<sup>th</sup> anniversary of the UNESCO Global Geopark Network.

The Fuchsia Market in Wemding 25-26 May and Rose Market in Nördlingen 15 June attracted nature fans and families to the historic town centers. The GenussKulturMarkt hosted by the KulturLand Ries Museum on 5 May as well as the Asparagus Festival 26 May hosted by the “Geopark Ries culinary”-partner Spargelhof Murr attracted all ages with their motto of “Regionality and Sustainability”—so appropriate for an UNESCO Global Geopark. Tour guides staffed the Geopark Ries booths, providing promotions and information—including about the impact rock Suevite, “rock of the year 2024”—as well as games and activities that invite the whole family to actively engage with the fascinating geology of the Ries Crater. Attendance at the markets was estimated in the thousands.

2. Highlight most successful activities of your EGN Week 2024:

The Kite Festival, held on multiple dates across various geopark towns, was a significant event promoting togetherness and multiculturalism. It provided a wonderful opportunity for children from diverse backgrounds to come together, play, and enjoy the experience of flying beautiful and colourful kites. This festival not only brought joy and excitement to the young participants but also fostered a sense of unity and inclusion among the community.

The closing event at the Floristella-Grottacalda Mining Park was particularly notable. It symbolized the culmination of a series of joyful and inclusive activities, highlighting the importance of community cohesion and cultural diversity in the ongoing growth and development of the geopark.

- total number of visitors/participants: ..... about 1500
- total number of participants of the **online** events: ..... 0

#### 2. Highlight most successful activities of your EGN Week 2024:

This year we organised a seminar celebrating the intangible cultural heritage of our region, the tradition of sahti making, which represents the oldest beer style in the world and remains a living heritage throughout our geopark area. The seminar was organised in collaboration with the Päijät-Häme Regional Council and the Lahti City Museum / Regional Museum of Päijät-Häme. The seminar was very successful with some 70 participants, excellent presentations and lively conversation.

Another especially successful event was a string concert open to public at an old industrial cultural heritage site by the Lake Päijänne.

During the City of Lahti Environmental Village event in the main city of the Geopark, the three Geopark Kindergartens of the city received the city's annual environmental award, recognizing their valuable work developing and promoting the education for sustainability.

- total number of visitors/participants: ..... 1350
- total number of participants of the **online** events: .... broadcasts regional television (400.000)

#### 2. Highlight most successful activities of your EGN Week 2024:

In Geopark Schelde Delta, because of its size, publicizing activities is mainly done through social media from within the Geopark itself and through the partners.

Special was the attention of the regional television for the activities with wide coverage into the living room.

A special activity was the knowledge meeting held by a group of residents who are actively working bottom-up on a coastal defense idea through building with nature, involving government, knowledge institutes and a university. The Geopark facilitates this initiative and also contributes coastal process and geomorphological knowledge.

Our traveling Geopark exhibition with side events during for schoolchildren and adults was also a great success.

Geopark entry points/museums organized field excursions and tours for schoolchildren.

Themes included geology, archaeology, landscape, sustainable groundwater use, flood protection and climate change.

The weeks ended with a partner meeting with (info)market around the theme of regional and sustainable food in the Geopark.

- total number of visitors/participants: 15 students (Junior Rangers) and 15 other partner participant representatives during EGN week. (there were additional participants at a supplementary week with another school during June)
- total number of participants of the **online** events: ..... n/a

#### 2. Highlight most successful activities of your EGN Week 2024:

We used EGN week to successfully launch Shetland Geopark Junior Ranger Programme with our first participating school.

Collaborating with multiple partners and helping to instil a sense of pride in Shetland's nature and our landscape, fifteen pupils (age 14) spent 5 days out of school:

- undertaking geology tours,
- participating in biosecurity and conservation activities on Noss Nature Reserve
- learning about the importance of Peatland restoration to help address the climate emergency and participating in the planting of sphagnum moss
- gaining knowledge on native tree species and planting them AND
- being educated on the conservation of historic landmarks such as Clickimin Broch & embracing conversations with visiting tourists on how to respect & care for our heritage.

This partnership pilot project and launch has been hugely successful with both professionals and schools showing exceptional dedication in advancing the initiative. It will be even bigger in 2025!

- total number of participants of the **online** events:.....70

#### 2. Highlight most successful activities of your EGN Week 2024:

During the 2024 European Geopark Week, 12 activities were organized, focusing on three main areas: (1) the dissemination of the geological heritage of the Sierra Morena de Sevilla Natural Park – UNESCO Global Geopark (PNSMS) across all educational levels, (2) teacher training in geo-education, and (3) the promotion of scientific activities by universities within our territory.

To achieve these objectives, the following activities were carried out:

- Workshop for teachers in the PNSMS in collaboration with the Secondary Education Teacher Training Center (1 theoretical session and 2 practical sessions on geotrails)
- 2 field trips with students from the University of Seville and the University of Cádiz
- A Geopark outreach lecture at the Faculty of Tourism of the University of Seville
- 2 workshops about “rock and mineral of the PNSMS – Geopark” in schools
- Distribution of GEOKITs in PNSMS in schools.

- number of printed articles on EGN Week activities: 8
- total number of visitors/participants: 557
- total number of participants of the *online* events: 1998

#### 2. Highlight most successful activities of your EGN Week 2024:

On the one hand, it is worth highlighting the catalogue of educational resources and activities, which has been published during the EGN Week, with the aim of compiling in one document the different educational materials that we have been designing in recent years. The catalogue has been disseminated on official social networks and via email to professionals in formal and non-formal education so that they can make use of the materials and resources included in this catalogue. On social networks has been very well received with almost 1400 views.

On the other hand, the director of the Governing Board of the Geopark, Julián García, has had a great success in his conference on the “Toponymy of Subbética, Sierras Subbéticas in 5000 names”, with 43 attendees and 698 views on the live transmission on social networks. People of different ages were interested in knowing the many traditional names given to the places around them, enriching themselves with this intangible cultural heritage.

#### 2. Highlight most successful activities of your EGN Week 2024:

##### World Environment Day 2024.

The event was held in collaboration with the UNESCO Global Geopark of Sitia, with the teachers and students of the 'B class of the 4th primary schools of Sitia.

The action aimed to raise students' awareness of environmental protection issues, of natural phenomena and the role played by climate change as well as human intervention in nature. Also, information on the biodiversity can be found at the mouth of the Pantelis River.

Through the educational games of the Geopark, related to climate change and with the cooperation of the teachers, the students were informed, participated and certainly returned to their classrooms full of images and thoughts from a habitat that is so close to us, but we know little about him. For a habitat that climate change and human intervention have left their negative imprint on the landscape.

#### 2. Highlight most successful activities of your EGN Week 2024:

We have celebrated the inclusion of the transhumance in the representative list of intangible heritage by UNESCO. As it is an essential activity to explain the making of the cultural landscape of the Geopark, and still alive, we have focussed not only in the activity itself but also we have visited a group of young shepherds to know directly how they work.

The Geopark has been awarded with the declaration of Speleological Interest Site by the Spanish Society for Speleology and Karst Sciences. It is the first time that this award is given in Spain and recognizes not only the first class endokarstic heritage that Sobrarbe-Pirineos holds but also the intense work made by the Geopark in order to protect it, to support speleologists and researchers and to make it accessible to the general public through dissemination and education activities during the 18 years of the existence of the Geopark.

2. Highlight most successful activities of your EGN Week 2024:

In 1024 the pagan laws of Norway was replaced by the Christian law system. Both the actual happening in 1024 and the 1000-year anniversary happened inside Sunnhordland Geopark. As part of the diverse anniversary for this event of values, Sunnhordland Geopark participated with two arrangements; "*How to value Nature*"? and "*I am building myself a boat*". The first arrangement was a panel debate in relation to the Montreal agreement and a contemporary news issue in Norway on the rapid reduction of nature. In the panel we had some of the best known Norwegian professionals in law/human rights, biology, statistics, geology/mining and environmentalism. One of Norway's best known actors introduced the debate. Our geologist was moderator for the event.

The second arrangement was in collaboration with the regional museum (geopark partner), where children were invited to participate in building a model of a traditional wooden boat (faering) from this area, learning the names of each piece and also practice on riveting. The panel debate had an audience of appr. 100, the boat project about the same number of kids with hands-on boat building during one day.

2. Highlight most successful activities of your EGN Week 2024:

For the first time, the EGN Weeks started on 15 May with a Geopark day to connect all our different networks and provide a platform for dialogues (with 50 participants completely booked out). A workshop was offered on the topic of 'How do I integrate specific SDGs into my daily work?'. The Geopark also provided information about annual events such as EGN-weeks and the importance of the international annual days. Exciting activities took place at our information centres. Examples include several museum events, a Kneipp day and a guided barefoot walk at the Panoramatherme Beuren, several guided tours e.g. to the Swabian Alb only moor on Biodiversity Day and an action day centred around historic mills. The event concluded with a public lecture by the Geopark on the subject of 'Climate in fast motion', which described the specific effects of climate change on the Swabian Alb.

Trollfjell UNESCO Global Geopark celebrated the EGN week with three activities aimed at different target groups. In collaboration with the Norwegian Trekking Association, we offered a free kayak course for local youths in Brønnøy. The course gave the participants a certificate that opens for discovering our great geological phenomena “the strandflat” from sea level. In Vefselstad, we invited the locals on a guided tour along the historical Vistnes-trail, led by our geologist and an historian from Helgeland Museum. Finally, there was the grand opening of the Norwegian Scenic Route’s new facilitation by the international tourism attraction mount Torghatten, including our very own geological exhibition. The exhibition tells the fascinating geological story about how mount Torghatten was shaped – with a hole piercing straight through it!

- total number of participants of the **online** events: ..... 0

#### 2. Highlight most successful activities of your EGN Week 2024:

One of the highlights of EGN Week at Troodos Geopark was our special event: the Perseids meteor shower viewing, held in the heart of the park at the Troodos Geopark Visitor Centre, located in the historic Asbestos Abandoned Mine area. This extraordinary celestial event attracted hundreds of visitors, all eager to witness the breath-taking meteor shower under the starry skies of the Troodos mountains. It was a unique opportunity for people from all corners of Cyprus to gather, not just for stargazing, but to connect with others who share a passion for the beauty of nature and the night sky.

Throughout the week of August 5-12, 2024, we also welcomed numerous students from various summer schools to the Troodos Geopark Visitor Centre. These young visitors had the chance to enjoy guided tours that unveiled the park's fascinating geological heritage. Their curiosity and enthusiasm were infectious, and it was a joy to see so many eager minds discovering the wonders of this remarkable mountain region.

In addition, we hosted special presentations and activities for children and adults at summer camps in the Troodos area. Our team organized engaging educational activities that introduced participants to the rich natural and geological wonders of the Geopark. It was heart-warming to see both children and adults captivated by the experience, eager to learn, and deeply appreciative of the beauty and richness that Troodos Geopark has to offer.

This week of events truly showcased the power of nature to inspire, educate, and bring people together.

Geo'nConcert was this year highlight of the Muskau Arch EGN Week. It was also the closing event of this year's EGN Week. The event was attended by Geopark residents and tourists visiting the area. During the event, they were able to listen to live music, take a ride on the narrow-gauge railway and visit exhibitions dedicated to the Geopark. There were also attractions for children and something to eat and drink. The whole event took place at the Former Brickworks, a narrow-gauge railway now used for tourism, in the past it was used to transport clay to the brickworks, the site is surrounded by post-mining reservoirs characteristic of the Geopark and the visitors were able to visit the Geopark exhibition on the geology and industrial past of the region. This event combined the pleasant with the useful in a special way. With good music raising awareness of the region's heritage.

2. Highlight most successful activities of your EGN Week 2024:

In May, our guest guides attended three training sessions on the wild orchids of the Vulkaneifel - 32 different rare species of wild orchids grow in the Vulkaneifel, mainly on calcareous soils. Our guides are educated multipliers who offer over 600 guided tours every year.
